# *Acknowledgment*

1. To my teachers for helping me to use the program and apply it practically.
2. To my Principal for providing us the atmosphere, computers and useful products on which we can work
3. To my fellow batch mates for helping me out when in need or in problem regarding usage of program.
4. To the staff who keeps our equipment's safe i.e. in working condition.

## **Hardware Requirement & Software Requirement**

- 1. 64 BIT OPERATING SYSTEM**
- 2. 2 GB RAM**
- 3. PYTHON 3.7 –32 BIT**
- 4. MY SQL 5.1 SERVER**

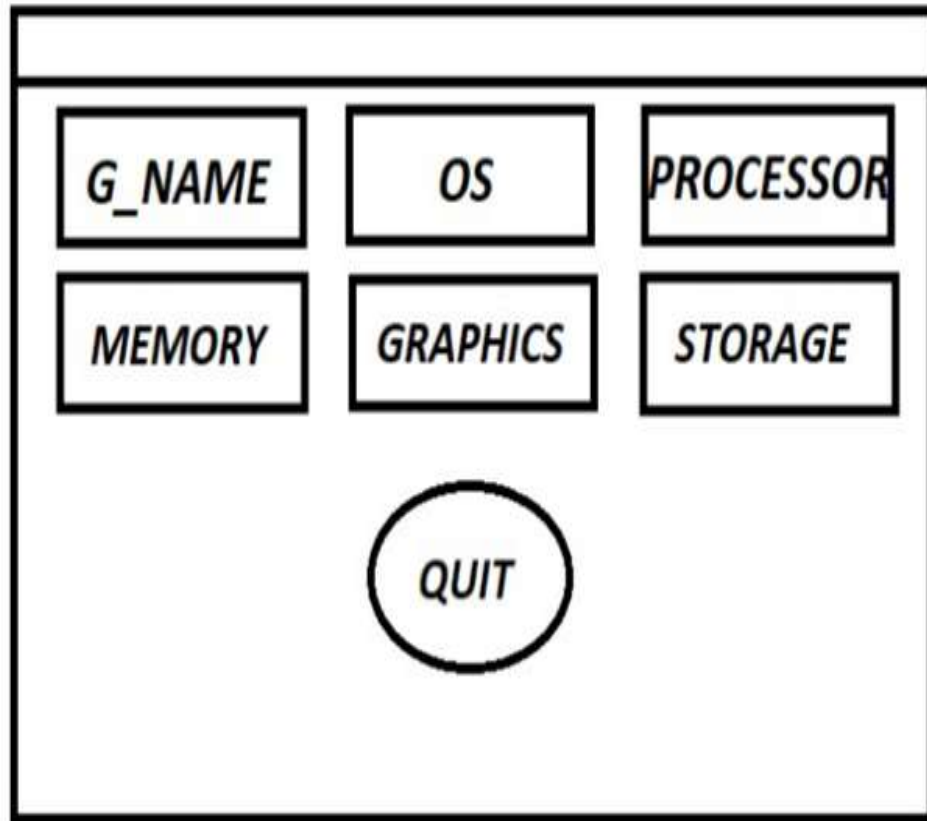

### **EXISTING SYSTEM**

*Till now if we have to buy a game we have to check that the game would run on our PC so to do this we have to go through many sites to see that configurations would match.*

### **PROPOSED SYSTEM**

*So i propose that we should write a program that would enable the user to input the system configuration of his PC and my program will show the list of the games that would run on his SYSTEM*

### **Front end**

*Back end*
